

# 2023 Exceptional Trainee Awards

## Call for Nominations

Graduate students and postdoctoral fellows at the Harper Cancer Research Institute (HCRI) have established a reputation for excellence in and out of the lab. To honor these exceptional trainees, HCRI will be presenting three awards at our annual Cancer Research Day on March 27, 2023. One award will be given in each of the three following categories:

- ❖ **Exceptional Mentor:** Awarded to the trainee for their exceptional leadership in mentoring others.
- ❖ **Exceptional Team Science:** Awarded to the trainee who best exemplifies HCRI's foundation in interdisciplinary research through his or her commitment to collaboration.

**Eligibility:** Any graduate student or postdoctoral fellow affiliated with HCRI is eligible to receive the awards. Any member of HCRI may nominate a graduate student or postdoc for one of these awards. It is our hope that students, postdocs, faculty, and staff will participate in the nomination process. We encourage every member to take a few moments to consider whom he or she feels would be an appropriate awardee. The nomination process is easy.

**Nominations** (no more than 1 page):

First line: The name of the award (community, advocacy, or team science)

Second line: Nominee's name, position (Graduate Student or Postdoctoral Fellow), and year

Third line: Your name and position

Body: Provide a complete and concise explanation for why the nominee is deserving of this award.

Submit to [cancer@nd.edu](mailto:cancer@nd.edu) no later than 5 pm on Tues, Feb. 28
